U.S. Patent Appln. No. 10/626,108

Response Dated June 5, 2006

Reply to Office Action of Mar. 3, 2006

Docket No. BOC9-2003-0006 (375)

**Amendments to the Claims:** 

This listing of claims will replace all prior versions and listings of claims in the instant

application:

**Listing of Claims:** 

1. (Currently Amended) A method to enable instant collaboration via the use of

pervasive messaging, comprising the steps of:

receiving a call from a caller to a callee

transferring the call to a voicemail system when the callee is unavailable;

determining if the callee is available via instant messaging; [[and]]

querying the caller if they want to leave one among a voice message and an instant

message; and

recording a voice message from the caller to the callee and generating a text

message by transcribing the voice message if the caller elects the option of leaving the

instant message, the text message subsequently being delivered to the callee.

2. (Currently Amended) The method of claim 1, wherein the method further

comprises the step of recording a voice message from the caller to the callee and

transcribing the voice message to a text message when the caller selected the instant

message as an option querying a caller who elects to leave voice message to determine

whether the caller wants to also leave an instant message for the callee, wherein the instant

message is delivered at a predetermined scheduled time dictated by the caller.

3. (Currently Amended) The method of claim [[2]] 1, wherein the method

further comprises the step of sending the text message to the callee via the instant

messaging system.

- 4. (Currently Amended) The method of claim [[2]] 1, wherein the method further comprises the step of translating the text message to provide a translated text message and sending the translated text message to the callee via the instant messaging system.
- 5. (Original) The method of claim 1, wherein the method further comprises the step of querying the caller as to when an instant message should be delivered when the caller selected the instant message as an option.
- 6. (Original) The method of claim 1, wherein the method further comprises the step of delivering the instant message to the callee at a predetermined scheduled time as directed by the caller.
- 7. (Withdrawn) A method to enable instant collaboration, comprising the steps of: receiving a text message having a designation for text-to-speech conversion via an instant messaging server, wherein the text message is intended for a phone coupled to a voicemail system;

recognizing the designation;
converting the text message to a voice message;
calling the phone; and
delivering the voice message to the voicemail system.

8. (Withdrawn) The method of claim 7, wherein the method further comprises the step of enabling a scheduled delivery of the voice message to a user.

U.S. Patent Appln. No. 10/626,108 Response Dated June 5, 2006 Reply to Office Action of Mar. 3, 2006 Docket No. BOC9-2003-0006 (375)

- 9. (Withdrawn) The method of claim 7, wherein the method further comprises the step of delivering the voice message to a user.
- 10. (Withdrawn) The method of claim 7, wherein the method further comprises the step of delivering the voice message to the voicemail system.
- 11. (Currently Amended) A system enabling instant collaboration, comprising: a voicemail system; an instant messaging system coupled to the voicemail system; a processor in the system programmed to:

receive a call when a callee is unavailable determine if the callee is available via the instant messaging system; [[and]] provide a caller the option among a voice message and an instant message; and, record a voice message from the caller to the callee and generate a text message by transcribing the voice message if the caller elects the option of leaving the instant message.

- 12. (Original) The system of claim 11, wherein the processor is further programmed to deliver the instant message to the callee at a predetermined scheduled time as directed by a caller.
- 13. (Original) The system of claim 11, wherein the processor resides within the voicemail system.
- 14. (Withdrawn) A system enabling instant collaboration, comprising: a voicemail system;

an instant messaging system coupled to the voicemail system;

a processor in the system programmed to:

receive a text message having a designation for text-to-speech conversion

via the instant messaging system, wherein the text message is intended for a phone

coupled to the voicemail system;

recognize the designation;

convert the text message to a voice message;

call the phone;

deliver the voice message to the voicemail system.

15. (Withdrawn) The system of claim 14, wherein the processor resides within the

voicemail system.

16. (Original) A machine-readable storage, having stored thereon a computer

program having a plurality of code sections executable by a machine for causing the

machine to perform the steps of:

receiving a call from a caller to a callee

transferring the call to a voicemail system when the callee is unavailable:

determining if the callee is available via instant messaging; [[and]]

querying the caller if they want to leave one among a voice message and an instant

message; and

recording a voice message from the caller to the callee and generating a text

message by transcribing the voice message if the caller elects the option of leaving the

instant message.
